

Delock Lighting 4-fold distributor for LED light bars

Description

This distributor allows you to connect up to 4 LED light bars to only one power supply. You only need to connect the optional power supply to the distributor, and then connect the LED light bars to the distributor using the connection cables. It can be simply bolt on to most cabinets due to its small and slim design. Please note that the power supply must have enough capacity to power all 4 light bars (see description of the power supplies).
