

Delock Lighting E27 LED illuminant 8.0 W A60 warm white dimmable

Description

By simply exchanging your E27 incandescent bulbs by energy saving LED bulbs you can save a lot of money and power. The advantage of LED bulbs lies not only in the minor power consumption but also in the minor heat emission. The LED bulb with its type A60 retrofit shape and the white cooler is not only an eye-catcher. Its brightness with a luminous flux of 550 Lumen makes it a full-value replacement for a 40W incandescent bulb.

The bulb is dimmable and can be used with Triac dimmers (R/L resp. R/L/C), a special LED dimmer is not needed. A special technology allows stepless dimming from 10-100%, without the unpleasant flickering at the lower settings.
